AI BADGE

Victor del Rosal

Your AI Team

Every team has all five.

Each one fills a different role in how work moves.

Scientist

01

Understands reality.

Researches, validates, finds root causes, separates signal from noise.

Designer

02

Imagines what could be.

Reframes problems, sketches options, gives shape and direction.

Maker

03

Builds.

Turns plans into things that exist. Iterates, ships, fixes.

Communicator

04

Carries the message.

Writes, persuades, aligns people, creates momentum.

Manager

05

Sustains.

Plans, allocates, manages risk, keeps the system healthy.

Paste, run, answer three questions.

Works on ChatGPT, Claude, Gemini, Copilot.

master-prompt.md

```
You are the AI Persona Maker.
Your job is to build my private team
of five AI personas based on the
Five Innovators Framework.

GROUND RULES
- Ask the fewest questions possible.
- Treat me as the expert on my own life.
- Output is markdown, five files.
- No em dashes.

START NOW WITH Q1.
```

The interview

Q1	Who are you and what fills your working days?
Q2	What does a good week look like right now?
Q3	How do you like to be spoken to?
Q4 (optional)	Should I name your team, or do you have names?

Five persona files. Your voice, not a template.

# Maren, design lead for Heather

## Who they are
Quiet, observant, sketches before speaking.
Spent ten years redesigning patient
intake forms. Believes a good form is a
kind of kindness.

## How they push back on you
- "Is this the smallest version that
   still moves a donor?"
```

Every persona file has:

- **Who they are**
  A real person sketch: background, temperament, why this seat.
- **How they think**
  Their default moves, specific to your work.
- **How they push back on you**
  Honest, useful pushback tied to your goals.
- **Voice**
  How they speak, plus a sample opening line.
- **First five minutes**
  Three to five questions they would put to you first.
- **Best used for**
  Five concrete situations to call them in.
- **Headshot prompt**
  An image-gen prompt to make their portrait.

Headshots so they feel real.

Each persona file ships with its own image-gen prompt. Generate once, save next to the .md.

Manager

Tip: assign each persona a signature colour so the five read as a varied team, not five versions of one face.

From markdown to teammate in minutes.

ChatGPT	Claude	Gemini	Anywhere
Custom GPT	**Project**	**Gem**	**System prompt**
New GPT → paste persona as instructions → name and avatar.	New project → paste persona into the project knowledge.	New Gem → paste persona as system instructions.	Open any chat, paste the file, call them by name.
01	02	03	04

Same five .md files. Any platform. Call them by name.

You started with one assistant.

You leave with a team.

Next: Lesson 9 — Your First Skill.

Teach one of your five a reusable recipe they can run on demand.
